Preface

State Bank of Pakistan (SBP) produces reliable and timely statistics pertaining to central banking and related areas of interest for the use of policy makers, researchers, academia and other stakeholders. The Monthly Statistical Bulletin (MSB) is a reflection of such efforts. This publication provides a wide range of data disseminated in one place, most of which is also available on the websites of the respective data producers such as SBP and Pakistan Bureau of Statistics (PBS). It is available on the SBP website at: https://www.sbp.org.pk/reports/stat_reviews/Bulletin/index.htm. To further facilitate the users, data tables are provided in MS excel format. Moreover, for selected tables we have also provided links to archive of respective datasets at the end of relevant tables.

Readers are also encouraged to use EasyData (easydata.sbp.org.pk), an intuitive and interactive data portal from where one can access, download and plot time-series data from a collection of more than fourteen thousand variables.

Notes:

1. Classification of size wise advances has been improved by collecting data from all Scheduled banks based on actual size of each and every account. Previously, it was based on estimates by average size of different size groups.
2. The upper limits of the range is exclusive of amounts e.g. Rs. 500,000 to 750,000 stands for Rs. 500,000 and over but less than Rs. 750,000
3. 'No of Accounts' represents the total number of advances which fall in the respective class.
4. 'Amount' represents the total amount of all advances falling in the particular class.
5. This Data is being published on quarterly basis w.e.f. March 2023.

- Gross disbursements mean the amounts disbursed by Reporting Institutions (RIs) either in Pak Rupees or in foreign currency against loans during the month. It also includes loans repriced, renewed or rolled over during the month. In case of running finance the disbursed amount however means the maximum amount availed by the borrower at any point of time during the month.
- Foreign currency loans are first converted into Pak Rupees at the prevalent exchange rates of the last day of the reporting month.
- Loans (Disbursed & Outstanding) mean all types of RIs's advances including working capital finance and disbursements against payments of documents i.e. Letters of credit, inland bills etc. but excluding foreign bills. * A REER index of 100 should not be misinterpreted as denoting the equilibrium value of the currency. 100 merely represents the value of the currency at a chosen point in time (in this case the average value of the currency in 2010). Therefore, movement of the REER away from 100 simply reflects changes relative to its average value in 2010 and is unrelated to its equilibrium value.

NOTES: -

- i. From July 2020, PBS has discontinued the dissemination of CPI on base 2007-08 using which the REER index was calculated, and changed the base to 2015-16.
- ii. RPI and REER indices may be revised due to revisions in base period or splicing factor of CPIs data by PBS.
- iii. Weights and number of trading partners have been updated from Jan, 2016 and revised for Jan, 2013 to Dec, 2015. The REER and NEER have been recalculated since Jan, 2013 using these revised weights and number of trading partners.
For detail, please visit the Revision Study at <https://www.sbp.org.pk/departments/stats/NEER-REER.pdf>

iv. Appreciation (depreciation) of REER is sometimes confused with the concept of currency overvaluation (undervaluation) while these are two separate concepts and not necessarily interpreted in the same direction. For an assessment of a country's exchange rate misalignment, a more sophisticated analysis is required taking into account factors such as demographics, external and fiscal sustainability, and some other macroeconomic fundamentals over the medium-term. The following explainer-video on REER [by SBP] goes into further detail. <https://youtu.be/RX0Oa7oevLg>

Trade data compiled by Pakistan Bureau of Statistics and State Bank of Pakistan may differ from each other due to the following reasons: -

1-The SBP Exports and Imports include general merchandise (including goods procured on parts by carriers) and net export of goods under general merchanting based on Balance of Payment Manual (BPM6). The SBP export and imports are based on realization of export proceeds and import payments made through the banking channel. Information on exports and imports unaccounted for by the banking channel are collected from the relevant sources and added to the exports/imports data reported by banks to arrive at the overall exports and imports. The trade data of PBS is, on the other hand, based on physical movement of goods crossing the custom boundaries of Pakistan. Both sets of data are comparable with some deviations due to difference in coverage, timing, valuation and classification of exchange record vis-à-vis customs record.

2- The SBP trade data and PBS exports are valued on Free on board (f. o. b.) basis, whereas PBS import data is on Carriage Insurance & Freight (c. i. f.) basis.

3- Cumulative figures are of Financial Year (Jul-Jun).

These indices are used to measure changes in the unit value and quantity of Exports & Imports with reference to base year. Laspeyer's formula is used for the computation of these indices that is as under:

$$\text{Unit Value Index} = \frac{\sum P_n Q_o}{\sum P_o Q_o} \times 100 \qquad \text{Quantum Index} = \frac{\sum Q_n P_o}{\sum P_o Q_o} \times 100$$

Where:

P_n = Price (Unit Value) of each item during the current period

P_o = Price (Unit Value) of each item during the base period

Q_n = Quantity data (Volume) of each item during the current period

Q_o = Quantity data (Volume) of each item during the base period

Nominal Effective Exchange Rate

It is an index of the bilateral nominal exchange rates of Pakistan relative to its major trading partners. The nominal exchange rate index with each trading partner is weighted by that country's share in imports, exports, or total foreign trade.

Real Effective Exchange Rate:

Chapter 7- Capital Market**Index Number**

Stock market index is used for measuring changes in the prices of stock market securities in respect of the base year prices.

The KSE-100 Index was introduced in November 1991 with base value of 1,000 points. The Index comprises of 100 companies selected on the basis of sector representation and highest market capitalization, which captures over 80% of the total market capitalization of the companies listed on the stock exchange. One company from each sector on the basis of the largest market capitalization and the remaining companies are selected on the basis of largest market capitalization in descending order. This is a total return index i.e. dividend, bonus and rights are adjusted.

All Share Index

The KSE all share indexes was developed and introduced on September 18, 1995. This is also a total return index (dividend, bonus and adjusted rights shares) computed for all companies listed at KSE.

Ordinary Shares

The most common term of shares that entitles their holders to have ownership in the company. Holders may receive dividends depending on profitability of the company or recommendation of the directors.

The market value is worked out by multiplying the market price by the total number of shares outstanding and added together for the component groups as also for the entire list to compile the series.

Preference Shares

$$CPI = \frac{\sum (P_n / P_0) W_i}{\sum W_i} \times 100$$

Where

P_n = Price of an item in the current period

P_0 = price of an item in base period

W_i = Weight of the i^{th} item in the base period.

Wholesale Price Index

Wholesale Price Index (WPI) is designed to measure the directional movements of prices for a set of selected items in the primary and wholesale markets. Items covered in the series are those, which could be precisely defined and are offered in lots by producers/manufacturers. Prices used are generally those, which conform to the primary sellers realization at *ex-mandi* (market), ex-factory or at an organized wholesale level

Gross Domestic Product

GDP of a country is one of the ways of measuring the size of its economy. GDP is defined as the total market value of all final goods and services produced within a given country in a given period of time (usually a year). It is also considered the sum of value added at every stage of production (the intermediate stages) of all final goods and services produced within a country in a given period of time, and it is expressed in monetary terms. Followings are the three approaches to measuring and understanding GDP:

- i. **Expenditure Based**
Expenditure-based gross domestic product is total final expenditures at purchasers' prices (including the f.o.b. value of exports of goods and services), less the f.o.b. value of imports of goods and services.
- ii. **Income Based**
Income-based gross domestic product is compensation of employees, plus taxes less subsidies on production and imports, plus gross mixed income, plus gross operating surplus.
- iii. **Output Based**
Output-based gross domestic product is the sum of the gross values added of all resident producers at basic prices, plus all taxes less subsidies on products.

Basic Price

The basic price is the amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any tax payable, and plus any subsidy receivable, on that unit as a consequence of its production or sale; it excludes any transport charges invoiced separately by the producer.

Gross Value added at Basic Prices

Gross value added at basic prices is output valued at basic prices less intermediate consumption valued at purchasers' prices.

Gross National Income

GNI measures the total economic growth of a country and takes into consideration income and taxes earned both internationally and domestically, while GNP only measures the income and taxes earned by domestic citizens.

Net National Income

Net national income (NNI) is the aggregate value of the balances of net primary incomes summed over all sectors is described as net national income.

Gross Fixed Capital Formation

The estimates of GFCF in Pakistan are primarily constructed separately for private and public sectors by economic activity as well as by capital assets. It comprises expenditure incurred on the acquisition of fixed assets, replacement, additions and major improvements of fixed capital viz. land improvement, buildings, civil and engineering works, machinery, transport equipment and furniture and fixture.
