* A REER index of 100 should not be misinterpreted as denoting the equilibrium value of the currency. 100 merely represents the value of the currency at a chosen point in time (in this case the average value of the currency in 2010). Therefore, movement of the REER away from 100 simply reflects changes relative to its average value in 2010 and is unrelated to its equilibrium value.

NOTES: -

i. From July 2020, PBS has discontinued the dissemination of CPI on base 2007-08 using which the REER index was calculated, and changed the base to 2015-16. For the compilation of the REER index, therefore, the CPI - Base 2015-16 has been spliced and rebased to 2010 using the IMF's methodology.

ii. RPI and REER indices may be revised due to revisions in base period or splicing factor of CPIs data by PBS.

iii. Weights and number of trading partners have been updated from Jan, 2016 and revised for Jan, 2013 to Dec, 2015. The REER and NEER have been recalculated since Jan, 2013 using these revised weights and number of trading partners.

For detail, please visit the Revision Study at <https://www.sbp.org.pk/departments/stats/NEER-REER.pdf>

iv. Appreciation (depreciation) of REER is sometimes confused with the concept of currency overvaluation (undervaluation) while these are two separate concepts and not necessarily interpreted in the same direction. For an assessment of a country's exchange rate misalignment, a more sophisticated analysis is required taking into account factors such as demographics, external and fiscal sustainability, and some other macroeconomic fundamentals over the medium-term. The following explainer-video on REER [by SBP] goes into further detail. <https://youtu.be/RX00a7oevLg>

Notes:

1. Export Receipts and Import Payments are calculated as per Balance of Payment (BoP).

2. Monthly SBP foreign trade data has been estimated using Quarterly Balance of Payments of SBP and monthly PBS foreign trade data from IFS for July 1970 to June, 1995.

3. The data before July, 2004 is general merchandise based on Balance of Payment Manual (BPM4), from July 2004 to June 2005 on BPM5 and from July 2005 to onward on BPM6.

Source: Pakistan Bureau of Statistics

Trade data compiled by Pakistan Bureau of Statistics and State Bank of Pakistan may differ from each other due to the following reasons: -

1. The SBP Exports (BOP) & Imports (BOP) include general merchandise, repairs on goods and goods procured on parts by carriers. The SBP export and imports are based on realization of export proceeds and import payments made through the banking channel. Information on exports and imports unaccounted for by the banking channel are collected from the relevant sources and added to the exports/imports data reported by banks to arrive at the overall exports and imports. The trade data of PBS is on the other hand, based on physical movement of goods crossing the custom boundaries of Pakistan.

2- The SBP data is general merchandise based on Balance of Payment Manual (BPM6), whereas PBS data is on Cost, Insurance & Freight (c. i. f.) basis.
